DETAILED ACTION

Response to Amendment

1. The amendment filed May 22, 2003 has been entered and accepted.
2. The rejection under 35 U.S.C. 112, 2nd paragraph is withdrawn.
3. The rejection under 35 U.S.C. 103(a) is withdrawn in light of the amendment.

Oath/Declaration

4. The oath or declaration is defective because:

The declaration lists Emir Gruer as Gruer Emir. The corrected filing receipt does not obviate the declaration error.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In independent claim 1, the step of controlling the solvent vapor concentration of a control gas has been amended to require the solvent vapor concentration to be between 50% - 80% (saturation). There is no support for this

Art Unit: 1752

concentration range. According to the specification, the concentration is controlled to be at least 50% (page 40, lines 9-16) and a solvent vapor concentration greater than about 80% of saturation is preferred (page 41, lines 1-2). 50% and 80% saturation are disclosed as lower limits with 100% being the only upper limit. There are no examples with the solvent vapor concentration in the 50% - 80% saturation range. See MPEP 706.03(o) and 2163.05 and *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976).

Response to Arguments

7. Applicant's arguments filed May 22, 2003 have been fully considered but they are not persuasive.

a. By amending independent claim 1 to require the solvent vapor concentration to be controlled between 50% - 80% saturation, Applicant has raised the issue of new matter. The rejection under 35 USC 130(a) over Mandal et al. in view of Takeshita et al. is withdrawn in light of the new matter.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1752

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
